IMPORTANT

- Make ALL document sizes equal to ad trim.
- Ink density should be no more than 300%.
- Above dimensions for bleed includes 1/8" extra on all sides.
- For type safety, keep all live matter AT LEAST 1/4" inside of magazine trim on ALL sides (including gutter for 2-page spread ads).
- DPI: 266-300 DPI on ALL images. Anything supplied less than 266 DPI will compromise quality of images.
- Proof and page file must have crop marks indicating trim.

PREPARING DIGITAL FILES

- Acceptable software: Photoshop, InDesign, Illustrator
- Platform: Macintosh
- Do not enlarge or reduce images by more than 20%. A larger percentage will cause loss of contrast/resolution in images.
- Eliminate all material from file not being used in final ad before submitting.

PREPARING SCANS AND IMAGE FILES

- PDF X1A files are required. It is suggested that native files (original art and fonts) be included for any changes needed for adjustment.
- Important: All files should be CMYK (NO RGB, LAB or Pantone colors).

FONTS

- It is recommended that type be no less than 8 pt. Black type should be 100%K. Multi-color type and/or knock-out type should be at least 10 pt. to avoid registration problems. Hairline rules are not acceptable in multi-color or knock-out.
- Supply a copy of all screen and printer fonts used in page layouts and in EPS files so font problems and re-flow errors can be fixed if required.
- Acceptable fonts: Type 1 and True type fonts
- Photoshop and Illustrator files must have fonts rasterized/converted to outlines.

REQUIRED COLOR PRESS PROOF SPECS

- Color proof MUST be sent with each file. Publisher is not responsible for color variation on press if ad is not accompanied by required proof.
- Color proofs that are certified SWOP format for 4-color work, such as: Epson, Imation™ Matchprint™; Kodak Approval Digital Color Proofing System; IRIS Pro SWOP, FUJI Color-Art® System CR-T4 SWOP.
- Proof must be pulled from the supplied digital file.

IMPORTANT NOTE

Publisher reserves the right to trim, reset or resize elements that are not to required specs. Reproduction quality is at the advertiser's risk if these publisher's specifications are not met.
